2. The rejection to claims 1-21 have been reviewed by board.
3. The rejection of claims 1-5, 7, 9-13 and 16-19 is affirmed.
4. The rejection of claims 6, 8, 14, 15, 20 and 21 is reversed.
5. Claims 1-5, 7, 9-13, 16-19 are cancelled by Examiner based on board decision.
6. Claims 6 and 14 have been converted into independent claims by Examiner.
7. Claims 6, 8, 14, 15, 20 and 21 are now being allowed (re-numbered as claims 1-6)

EXAMINER'S AMENDMENT

8. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
9. The application has been amended as follows:

IN THE CLAIMS

Please cancel claims 1-5, 7, 9-13, 16-19, and amend claims 6 and 14 as follows:

Claims 1-5, 7, 9-13, 16-19 (Cancelled):

Claim 6 (Currently amended):

A method for updating a running process, comprising:
allocating in executable program code text first memory space operable to
receive new program instructions comprising at least a first updated function;
allocating in executable program code text second memory space operable to
receive address information related to said new program instructions;
running said executable program code;
stopping execution of said executable program code;
injecting a jump instruction and an address of an update table at a location in a
memory containing a first instruction of a first replaced function, wherein said address of
said update table contains an address of a first instruction of said first updated function;
resuming execution of said executable program code, wherein said first updated
function is called in place of said first replaced function, and wherein said executable
code is updated in said memory;

The method of Claim 1, further comprising:

determining a first distance between a position within said code text at which
execution of said executable program code is stopped and an address of a first function,
wherein said first function is a function to be updated; and

in response to said first distance exceeding a predetermined amount, populating
an update table stored in memory with an address of a first updated function.

Claim 14 (Currently amended):

A computer implemented method, the method comprising:
receiving information identifying:
a running executable program to be patched; and
a function to be replaced;
accessing a symbol table in a memory for said executable program to be
patched;
obtaining from said symbol table an address of said function to be replaced;
stopping execution by a processor of said running executable program to be
patched;
injecting in said running executable program to be patched at a location in said
memory containing a first instruction of said function to be replaced a jump instruction
and an address of a new function, wherein said new function is executed by said
processor in place of said function to be replaced, and wherein a patched version of
said executable program is created in said memory;
resuming execution of said executable program by said processor, wherein said
patched version of said executable program is executed by said processor; and
~~The method of Claim 10, further comprising:~~
determining a number of bytes between a location within said executable
program at which said executable program is stopped and an address of said function
to be replaced.

--END OF AMENDMENT--

Allowable Subject Matter

10. Claims 6, 8, 14, 15, 20 and 21 are allowed. As the Board pointed out in the decision on appeal mailed on 06/23/2010, the closest cited prior art of Buban reference as cited by Examiner (paragraph [046-0047]) e.g. “moving to the beginning of patched code, or to the front of patched instructions, does not, by itself, teach determining a distance. The rejection fails to show how moving backwards to the beginning of patched code, or moving forward to the front of patched instructions, teaches determining a first distance between a position within said code text at which execution of said executable program code is stopped and an address of a first function”, and in as such manners as similar limitation recited in independent claims 6, 14 and 20, and thus each of the dependent claims are allowable for at least the same reasons.

11. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
